Projects

Steamify - Streaming Platform | *PHP, MySQL, JavaScript, Bootstrap*
- Developed a fully functional anime streaming platform using PHP and MySQL for backend operations.
- Implemented features like user authentication, anime categorization, search functionality, and video streaming.
- Designed a responsive UI using Bootstrap and JavaScript for an engaging user experience.

Netflix Clone | *MERN Stack, Firebase*
- Developed a fully functional Netflix clone using the MERN stack and Firebase for authentication.
- Implemented user authentication, movie browsing, and streaming features similar to Netflix.
- Deployed the application successfully. **Live Demo**

Spotify Clone | *React JS, Styled Components, Spotify API, Context API*
- Built a Spotify clone with ReactJS and Styled Components, utilizing Spotify API for real-time music data.
- Implemented authentication and personalized music recommendations using Context API.
- Deployed the project successfully. **Live Demo**

Technical Fest Website | *ReactJS*
- Designed and developed a website for my college's technical fest using ReactJS.
- Created an engaging UI to showcase event details, schedules, and registration features.

Portfolio Website | *HTML, CSS, JavaScript*
- Developed my personal portfolio website to showcase my skills, projects, and experience.
- Implemented a responsive design and interactive UI using HTML, CSS, and JavaScript.
- Deployed and hosted the website successfully. **Live Demo**

Technical Skills

Languages: HTML, CSS, JavaScript, React.js, PHP, MySQL, C, Java
Tools: GitHub, Git, VS Code, Vercel
Technologies: Microsoft Office, Advanced Excel, Power BI

Leadership / Extracurricular

Technical Fest 2025 - Organizer **2025**
MCKV Institute Of Engineering *Howrah, West Bengal*
- Successfully organized and managed the college's annual technical fest.
